MEMORANDUM FOR: [REDACTED] SA/DCI
FROM: Director of Central Intelligence
SUBJECT: Defense Intelligence School

7 FEB 1978

9 FEB 1978

I'd like to get a copy of the curriculum for the Defense Intelligence School and at the same time ask our man [REDACTED] who handled the issue of the DIA Building to let me know whether that building program included provision for new space for the DIA School. I assume it did; what I really want to know is if the building they are proposing, to put either at Bolling or on our campus, would also house the DIA School. If not, what provision is being made for replacing that facility?

25X1

Director: Yes, the School is included in the DIA building plans at 56,000 square feet (vice 107,000 now but including all support units which will be spread around the new building), plus an auditorium seating 350 which can be divided in half and will be available for the School. Curriculum is being sent and will be passed to you.
